ENVIRONMENTAL SUSTAINABILITY AND CLIMATE CHANGE POLICY

Interpretation

In this policy, 'the Company' means the TWG company that employs you (or, for policies about how we do business, the TWG company concerned): Roofworx (UK) Limited (Co. No. 08946095), Woodworx (Carpentry UK) Ltd (Co. No. 11828681) or Fire-worx (Fire Safety) UK Ltd (Co. No. 14615772). 'TWG' means those companies together, trading as TWG - The Worx Group.

SECTION 1: PURPOSE

As a contractor working in the UK construction industry, TWG recognises the importance of environmental sustainability and action on climate change. This policy and the supporting Action Plan provide the framework to improve our environmental performance by:

- minimising the negative environmental impact of our business, our sites and our vehicles;
- complying with environmental law, including the Environmental Protection Act 1990 waste duty of care, the hazardous waste regulations and the Climate Change Act 2008 net zero target;
- contributing positively to environmental sustainability and climate change action.

The policy focuses on the areas where our work has the greatest impact:

- waste: reducing, reusing and recycling materials, segregating waste on site, and using licensed waste carriers with waste transfer notes;
- site emissions and pollution: preventing dust, noise, run-off and spills, and the safe handling of hazardous materials;
- materials: choosing responsibly sourced and lower-carbon materials, including certified timber, and avoiding over-ordering;
- vehicles and plant: planning journeys, maintaining vehicles and moving to lower-emission vehicles and plant when they are replaced;
- energy: reducing energy use in our offices, workshops and on site.

SECTION 2: POLICY STATEMENTS

ORGANISATION

Environmental Performance

We recognise our activities have an impact on the environment and want to improve our environmental performance. We will measure and record a baseline for our environmental impact (including fuel, energy and waste) and set and publish targets for improvement in waste management, resource efficiency and greenhouse gas emissions. Where clients require it, we will publish a Carbon Reduction Plan to the PPN 006 standard.

We will continuously monitor our progress. We will develop a systematic approach throughout our different functions, including our supply chain, and establish an Environmental Management System (EMS) for the company. We will ensure we monitor compliance with this policy, and review it regularly to ensure it remains fit for purpose.

TWG - The Worx Group: Roofworx (UK) Limited, Co. No. 08946095 · Woodworx (Carpentry UK) Ltd, Co. No. 11828681 · Fire-worx (Fire Safety) UK Ltd, Co. No. 14615772
Registered office: Unit 1, Office 1 Tower Lane Business Park, Tower Lane, Warmley, Bristol BS30 8XT

Staff Engagement and Training

This policy is mandatory for all staff in all contexts to ensure that our activities are aligned with and carried out on the basis of the principles of environmental sustainability and climate change action. To ensure staff awareness and ownership of this policy we will: communicate with, train, and involve staff in the implementation and governance of this policy, and include environmental sustainability in job descriptions and performance reviews.

OUR WORK ON SITE

We will plan each job to reduce waste and pollution, including site waste planning, correct storage of materials and fuels, and spill prevention. We will look for new and practical solutions, such as lower-carbon materials, reuse of off-cuts and packaging take-back with suppliers, and will meet any environmental requirements set by our clients and principal contractors.

ADVOCACY

We will work with others in construction to support practical local action on climate change and environmental protection.

PARTNERSHIPS

We will work with other businesses to strengthen our respective capacities and to learn from their experience on environmental issues. We will seek new partnerships with environmental organisations that can provide specific knowledge and expertise, at local level, and with local environmental organisations.

SECTION 3: DEFINITIONS

Word/Term	Definition
Biodiversity	The variety of life in the world or in a particular habitat or ecosystem.
Climate change adaptation	Adapting to the climate change already ongoing.
Climate change mitigation	Reducing emissions of and stabilising the levels of heat-trapping greenhouse gases in the atmosphere.
Sustainable development	"Meeting the needs of the present without compromising the ability of future generations to meet their own needs."
