HEALTH AND SAFETY POLICY

Interpretation

In this policy, 'the Company' means the TWG company that employs you (or, for policies about how we do business, the TWG company concerned): Roofworx (UK) Limited (Co. No. 08946095), Woodworx (Carpentry UK) Ltd (Co. No. 11828681) or Fire-worx (Fire Safety) UK Ltd (Co. No. 14615772). 'TWG' means those companies together, trading as TWG - The Worx Group.

This policy does not form part of any employee's contract of employment and may be amended at any time.

Statement of Intent

TWG recognises its duties under the Health and Safety at Work etc. Act 1974 and the regulations made under it. Our aim is to prevent accidents and work-related ill health for our employees, subcontractors, clients, members of the public and anyone else affected by our work, including householders where we work in occupied homes.

So far as is reasonably practicable, the Company will:

- provide and maintain safe places of work, safe plant and equipment, and safe systems of work;
- assess the risks of our work and put suitable controls in place before work starts;
- provide information, instruction, training and supervision so that everyone is competent for the work they do;
- provide personal protective equipment (PPE) free of charge where risks cannot be controlled in other ways;
- provide adequate welfare facilities, first aid and emergency arrangements;
- consult employees on matters affecting their health and safety;
- make sure subcontractors are competent and work to the same standards;
- report and investigate accidents, incidents and near misses, and learn from them;
- have access to competent health and safety advice from Rely On Services, our external health and safety adviser; and
- monitor and review this policy at least annually and whenever there is a significant change.

Overall responsibility for health and safety rests with the Directors of each TWG company. This statement is brought to the attention of all employees and is displayed in the office.

Competent health and safety adviser: Rely On Services, an external health and safety consultancy that acts as the Company's competent health and safety adviser (H&S office). Employees can contact Rely On Services via the Office Manager. (Under the Management of Health and Safety at Work Regulations 1999, reg. 7, the Company must appoint one or more competent persons to help it meet its duties.)

Organisation and Responsibilities

Directors: have overall responsibility for health and safety; provide the resources needed; approve this policy; make sure risk assessments, training, monitoring and review take place; and lead by example.

TWG - The Worx Group: Roofworx (UK) Limited, Co. No. 08946095 · Woodworx (Carpentry UK) Ltd, Co. No. 11828681 · Fire-worx (Fire Safety) UK Ltd, Co. No. 14615772
Registered office: Unit 1, Office 1 Tower Lane Business Park, Tower Lane, Warmley, Bristol BS30 8XT

Contracts Managers and Site Managers: plan work safely; prepare or approve risk assessments and method statements (RAMS); make sure each site has the right controls, equipment, welfare and competent people; carry out site inspections; and act on findings.

Supervisors and Foremen: brief operatives on the RAMS before work starts (toolbox talks); make sure work is done as planned and PPE is worn; stop unsafe work; check equipment; and report accidents, incidents and near misses.

Operatives (all employees): take reasonable care of themselves and others (HSWA 1974 s.7); follow the RAMS, training and instructions; use equipment and PPE correctly; never interfere with anything provided for safety (s.8); stop work and report anything unsafe; and report all accidents and near misses.

Subcontractors: must be competent, provide their own RAMS and insurance details when asked, attend site inductions, follow the site rules and this policy, and report accidents and incidents to the Supervisor straight away.

Arrangements

Risk assessment and RAMS

Risks will be assessed under the Management of Health and Safety at Work Regulations 1999. Each job will have task-specific RAMS, which are reviewed when conditions change and briefed to everyone doing the work before it starts. Assessments of significant findings are recorded.

Construction (Design and Management) Regulations 2015

On every project TWG will meet its duties as a contractor (and as principal contractor, where appointed). This includes planning, managing and monitoring our work, following the principal contractor's construction phase plan, giving site inductions, and preparing a construction phase plan where we are the only contractor. On domestic projects we will take on the client duties as the law requires.

Working at height

Roofing is high-risk work. Under the Work at Height Regulations 2005, work at height will be avoided where possible; where it cannot be avoided, collective protection (scaffolds with edge protection, MEWPs, guard rails, netting) will be used in preference to personal fall protection. Fragile roofs and rooflights will be identified and protected. Ladders will only be used for short-duration, low-risk work. Scaffolds will be inspected before first use, every 7 days and after bad weather, and inspections recorded. Work will stop in high winds, ice or other unsafe weather.

Hot works

Hot works (for example torch-on roofing) will only be carried out under a hot works permit, by trained people, with suitable fire extinguishers at hand, combustibles removed or protected, and a fire watch kept during the work and for at least 60 minutes afterwards. Cold-applied alternatives will be considered first.

Fire

Fire risks on site and in our premises will be assessed under the Regulatory Reform (Fire Safety) Order 2005. Fire points, escape routes and emergency arrangements will be set up and briefed at induction. Flammable materials and gas cylinders will be stored safely.

Asbestos

No work will be carried out on any building built before 2000 without checking the asbestos survey or register. Where asbestos is suspected but not confirmed, work will stop until it has been checked. Employees will receive asbestos awareness training. Licensable work will only be carried out by a licensed contractor (Control of Asbestos Regulations 2012).

TWG - The Worx Group: Roofworx (UK) Limited, Co. No. 08946095 · Woodworx (Carpentry UK) Ltd, Co. No. 11828681 · Fire-worx (Fire Safety) UK Ltd, Co. No. 14615772
Registered office: Unit 1, Office 1 Tower Lane Business Park, Tower Lane, Warmley, Bristol BS30 8XT

Manual handling

Manual handling will be avoided where reasonably practicable, for example by using hoists, telehandlers and mechanical aids. Where it cannot be avoided it will be assessed under the Manual Handling Operations Regulations 1992, and employees will be trained in safe lifting.

Hazardous substances (COSHH)

Hazardous substances (including adhesives, primers, solvents, silica and wood dust, and fire-stopping products) will be assessed under the COSHH Regulations 2002, using the safety data sheets. Controls such as on-tool extraction, water suppression and respiratory protective equipment (face-fit tested) will be used, and exposure kept as low as reasonably practicable.

Personal protective equipment

Suitable PPE will be provided free of charge (HSWA 1974 s.9 and the PPE at Work Regulations 1992, as amended), maintained and replaced when worn or damaged. Employees must wear it as instructed and report any defects.

Training and competence

All employees will receive an induction and training for their role. Site operatives must hold a valid CSCS card (or equivalent) for their occupation. Training records, including for working at height, MEWPs, abrasive wheels, asbestos awareness and first aid, will be kept and refreshed as required.

Welfare

Toilets, washing facilities, drinking water, and somewhere to rest, eat and dry clothing will be provided or arranged on every site, in line with Schedule 2 of CDM 2015.

Accidents and RIDDOR

All accidents, incidents and near misses must be reported to the Supervisor immediately and recorded in the accident book. Reportable injuries, diseases and dangerous occurrences will be reported to the HSE by a Director or a person they nominate under RIDDOR 2013, within the required time limits. Accidents will be investigated so that lessons can be learned.

First aid

First aid needs will be assessed under the Health and Safety (First-Aid) Regulations 1981. Each site and vehicle will have a suitable first aid kit, and trained first aiders will be available. First aiders: TWG Operations and the Site Managers.

Consultation

The Company will consult employees on health and safety directly, through toolbox talks, site briefings and meetings (Health and Safety (Consultation with Employees) Regulations 1996). Employees are encouraged to raise concerns with their Supervisor or any Director.

Monitoring and review

Directors and managers will carry out regular site inspections and audits, and act on findings. Accident and incident trends will be reviewed. This policy will be reviewed at least annually, and after any serious incident or significant change in the law or our work.
